

ARUNKUMAR M

AWS Cloud Engineer | DevOps Engineer

Pondicherry, India | +91 9345544582 | arunkumarmurali07248@gmail.com | linkedin.com/in/Arunkumar

Professional Summary

Aspiring AWS Cloud Engineer / DevOps Engineer with a B.Tech in Information Technology (2026) and experience in software development, cloud-based application workflows, and system troubleshooting. Hands-on knowledge of AWS core services including EC2, S3, IAM, CloudWatch, CloudTrail, CI/CD concepts, Linux, Git, Python, Docker, and Infrastructure-as-Code fundamentals. Skilled in cloud deployment, monitoring, automation, and application support with a strong foundation in developing scalable and reliable cloud solutions.

Technical Skills

AWS Cloud: EC2, S3, RDS, VPC, SNS, Lambda, Route 53, EFS, CloudWatch, CloudTrail, IAM, Application Load Balancer (ALB)

DevOps: Git, GitHub, Docker, Kubernetes, Terraform, CI/CD Pipelines, Jenkins, NGINX

Monitoring: CloudWatch, CloudTrail, Grafana, metrics, logs, alarms

Infrastructure and Deployment: Infrastructure as Code (IaC), automated infrastructure provisioning, containerization, deployment automation

Operating Systems: Linux, Linux commands, file handling, system troubleshooting

Programming and APIs: Python, Node.js, REST APIs

Experience

BlueStacks Ltd.

Bangalore, India (Remote)

Software Development Intern

- Developed responsive front-end components using 3 core web technologies—HTML, CSS, and JavaScript—with a focus on usability and cross-device compatibility.
- Collaborated with engineers across 2 core development areas software development workflows and web application code optimization to improve code structure and maintainability.

Projects

End-to-End CI/CD Pipeline for a Microservices Application

GitHub | Jenkins | Docker | AWS EC2 | Terraform | CloudWatch

- Provisioned AWS infrastructure with Terraform (IaC) to support repeatable and automated infrastructure deployment.
- Built a Jenkins CI/CD pipeline covering source-code integration, application build, Docker image creation, and deployment.
- Integrated GitHub with Jenkins and containerized Node.js/Python application components with Docker for deployment on AWS EC2.
- Implemented Amazon CloudWatch monitoring for EC2 using metrics, logs, and alarms to improve operational visibility.

AWS 3-Tier Web Application Deployment

Amazon EC2 | VPC | Application Load Balancer | RDS | S3 | IAM

- Designed and deployed a 3-tier AWS web application architecture across networking, compute, database, and storage layers.
- Established an Amazon VPC with public and private network components to separate web, application, and database workloads.
- Deployed application workloads on Amazon EC2 and used an Application Load Balancer (ALB) for traffic distribution and availability.
- Integrated Amazon RDS for the database layer, Amazon S3 for object storage, and IAM roles and policies following least-privilege principles.

Education

Sri Manakula Vinayagar Engineering College

Pondicherry, India

Bachelor of Technology in Information Technology

2022 – 2026 (Expected)

CGPA: 7.5/10.00

Subramania Bharathi Higher Secondary School

Thirukkannur, India

Higher Secondary Certificate (HSC): 79%

2022

Secondary School Certificate (SSLC): 72%

2020

Certifications and Achievements

- Oracle: Cloud Infrastructure 2025 AI Foundations Associate
- AWS Academy: Cloud Foundations, Data Engineering, Generative AI Foundations
- Scaler: Java Programming - Mastering Fundamentals
- MongoDB: Introduction to MongoDB (2024)
- Kroolo Hackathon Bangalore - Finalist / Participant
